

# Household Coffee Filter Papers

Our portfolio of household coffee filter papers includes all of the most popular sizes for domestic coffee brewing machines.

We offer a full range of packaging formats, ranging from cartons to shrink wrap packs, two-component film blister packs, or bulk packs for special requirements. Private-Label-options, with exclusive packs of coffee filter papers available in customers' own brands, are a speciality. We are able to automatically fill carton packs with decalcifier, coffee samples or other giveaways. Inner and outer printed cartons or coffee filter pack inserts are an additional available advertising space.

KONOS household coffee filter papers are produced, as standard, with the doubly secure patented SINUS seam, without adhesive. As a high-quality alternative coffee filter, we also offer our patented PREMIUM coffee filter paper. This new PREMIUM product is folded without a bottom seam and therefore extremely tear-resistant. Additionally, a logo imprint onto the face of the coffee filter paper is possible. All sizes are available in white or natural brown quality paper, in 52 g/m<sup>2</sup> or 58 g/m<sup>2</sup> paper weights.

The paper used for our coffee filters is pure-grade paper, made at the company's paper-mill at Netstal, in Switzerland, free from all environmental pollutants. All our white paper is made from ECF or TCF-bleached pulp; all pulp, bleached and unbleached, is supplied from certified, sustainable forestry operations. Only wood-free virgin pulp is used for our paper without any recycled content. Our coffee filter paper conforms to all food legislation (EG 1935/2004, LFGB, BfR XXXVI) and to the requirements of the U.S. Food and Drug Administration (FDA). The resultant base paper is regularly tested by an independent laboratory, ISEGA, to whose safety standards it conforms. The quality of all our coffee filter papers is subject to defined and regularly monitored standards conforming to DIN EN ISO 9001.
