

Special Filter Types

Flat circles

A complete range of flat circles is available in sizes between 50 mm and 915 mm diameter, with or without centre holes, to fit all caterers' coffee-brewing machines and other filtering applications.

Coil filter rolls

For the coffee vending sector's machines, we offer a large selection of different size filter rolls with diameters of between 50 mm and 915 mm. The most popular coil widths are 89 mm, 93 mm and 108,5 mm.

Cooking oil filters

We supply some of the largest fast-food restaurant chains throughout the world with specialist filters for the re-use of cooking oil in their frying systems. This range of filters comes in various shapes and sizes to custom-fit all contemporary machinery.

Other food related products

Many of the filter products in our range are already used world-wide in a variety of food-related filtering applications, including the production and processing of products such as: Margarine, Beer, Edible Oil, Soups and Fruit Juices.

Commercial, Industrial & Blotting paper

Our filter products are particularly effective for filtering fluids such as paints and oils, under certain conditions. These products can be supplied cut to size and packed or, if preferred, in bulk. Blotting paper is produced and converted for the Stationery sector.

All KONOS special filter types are available in varying weights of both bleached and unbleached quality paper. A pack's contents can be adjusted to suit customers' particular requirements. KONOS special filter types, used as food related filter paper or industrial filter paper, are available either in sheet or roll format as well as bulk packs. Please ask for sizes, weights and packaging. Please ask for a bespoke product offer.

The paper for KONOS special filters is pure-grade paper, made at the company's paper-mill at Netstal, in Switzerland, free from all environmental pollutants. All our white paper is made from ECF or TCF-bleached pulp; all pulp, bleached and unbleached, is supplied from certified, sustainable forestry operations. Only wood-free virgin pulp is used for our paper without any recycled content. Our special filter paper conforms to all food legislation (EG 1935/2004, LFGB, BfR XXXVI) and to the requirements of the U.S. Food and Drug Administration (FDA). The resultant base paper is regularly tested by an independent laboratory, ISEGA, to whose safety standards it conforms. The quality of our special filters is subject to defined and regularly monitored standards conforming to DIN EN ISO 9001.
