

NEW Household Coffee Filter Paper KONOS Universal Premium Filter Multi-machine compatible

The Universal Premium Filter is a patented multifunctional coffee filter paper designed and developed by KONOS GmbH. This type of coffee filter papers fits the brewing units of all cone-style coffee machines up to 10 cups as well as all cone-shaped domestic brewing units designed for size Melitta® 1x2, size Melitta® 1x4® and size 4. It is also easily adjustable to fit all HARIO V60 pointed cone-shaped hand brewing drippers as well as Chemex® glass carafe coffee makers.

The Universal Premium Filter is a high-quality alternative to all standard coffee filter papers. The paper used for the Universal Premium Filter is produced exclusively from top-quality white, wood-free virgin pulp. The production process uses only clear spring water from the Swiss Alps, this results in an end-product which is guaranteed pure, clean-white and free of all environmental pollutants - for a cup of coffee of peerless quality.

The Universal Premium Filter is produced without a seam along its base, increasing strength and stability. With embossed seams at each side, Universal Premium Filter papers fit machines better, because of this more robust symmetrical shape. The Universal Premium Filter has a more consistent filtration rate with no aroma barrier. The result is a perfectly flavoured cup of coffee with pure aromas, making an everyday cup taste sensational.

The paper used for our coffee filters is pure-grade paper, made at the company's paper-mill at Netstal, in Switzerland, free from all environmental pollutants. All our white paper is made from ECF or TCF-bleached pulp; all pulp is supplied from certified, sustainable forestry operations. Only wood-free virgin pulp is used for our paper without any recycled content. Our coffee filter paper conforms to all food legislation (EG 1935/2004, LFGB, BfR XXXVI) and to the requirements of the U.S. Food and Drug Administration (FDA). The resultant base paper is regularly tested by an independent laboratory, ISEGA, to whose safety standards it conforms. The quality of all our coffee filter papers is subject to defined and regularly monitored standards conforming to DIN EN ISO 9001.

All brand names, trademarks, design patent, utility patents and service marks contained in this document (whether registered or unregistered) are property of their respective owners.

Standard specifications for Universal Premium coffee filter papers:

Size	Specification	Packaging type
Universal-Premium	According to customer requests; white	Compatible to customer requests
